Cubic Global Defense 2014 Supplier Performance Award Issued to TT Electronics-IMS

TT Electronics recognized for “exceptional” quality and customer service by a leading provider of realistic training systems and highly specialized support services for national military and security forces

Search terms: aerospace and defense electronics manufacturing services, low volume high mix, global electronics manufacturing, full systems integration, Nadcap, ITAR

9 April 2015, Perry, Ohio, USA

TT Electronics Integrated Manufacturing Services (IMS), a global provider of low volume, high mix electronics manufacturing solutions for the aerospace and defense industries, today announced that it has received [Cubic Global Defense's](#) Supplier Performance Award for 2014. This award was presented to select suppliers who demonstrated significant effort during the year.

The company earned recognition for its demonstrated quality, on-time delivery, and customer service at an “exceptional” level for the [Cubic Multiple Integrated Laser Engagement System Individual Weapon System](#) (MILES IWS) and Personnel Locator System (PLS) programs. Cubic’s MILES IWS is the U.S. Army’s latest generation tactical engagement simulation system in use today. The army chose Cubic’s MILES IWS to replace basic MILES at their home stations and Combat Maneuver Training Centers worldwide. U.S. and allied combat search and rescue crews rely upon Cubic’s PLS to help them covertly retrieve and provide assistance to downed military personnel behind enemy lines. Cubic’s system is the standard system carried onboard helicopters used for close air support. The award from Cubic Global Defense recognized IMS as an example of supplier performance required to maintain leadership in the defense industry.

“We are honored to receive the Supplier Performance Award from Cubic Global Defense, which recognizes our commitment to delivering highly reliable, on-time products and services to our customers requiring advanced, innovative technology,” said Mark R. Kray, Vice President and General Manager for TT Electronics-IMS. “Our work with Cubic reflects an ongoing investment in customer’s long-term success by establishing strong partnerships based on trust, respect and reliability.”

A leading, global contributor in the design and manufacture of [electronics and system integrations](#), IMS attributes its success in developing business with many of the world’s leading aerospace and defense companies to a culture grounded by innovation, partnership, continuous improvement and customer satisfaction. The company’s latest achievements demonstrate an unwavering commitment to meet the needs of customers in the high reliability, high technology aerospace and defense sectors.
